HEIGHT SAFETY FITTINGS AND FALL ARREST COMPONENTS

BLUE WAVE®

Blue Wave Rigging Hardware

In business since 1932 Danish based Blue Wave A/S is today among the leading manufacturers of high quality stainless steel rigging hardware. Focus has for years been on Marine, Architectural and Industrial sectors.

By constant development and investments in high tech production machinery, focus on customer needs and wishes, a well known brand name has been established.

Today's product range covers stainless steel wire fittings, ranging from Ø 2 mm to Ø 32 mm wire diameter, although the focus in the Lifeline range here is on Ø 8 mm wire only.

Key factor and future aim, is continued development backed by customer commitment and driven by market demand.

Applying efficient production, good design, low weight and optimal strength to its products Blue Wave strives to become the number one chosen supplier of rigging hardware.

Product information and contact

Manufactured to the highest quality and tested in their design and performance, Blue Wave components are used on buildings and structures around the world.

All products are AISI 316/316L quality and can be used in temperature range from -40°C to +100°C.

You are kindly requested to contact your local Blue Wave dealer/distributor, or Blue Wave direct, should you have any questions or need further documentation.

Lifeline wire fittings

Protecting the safety of individuals working at height with correct wire attachment is critical.

The right attachment/termination onto the wire can only be achieved by firmly pressing the material of the terminal onto the strands of the wire – in this way app. 90% of the wire Break load will be achieved.

The Blue Wave Lifeline fittings can be divided into three groups of wire attachment.

Please pay attention to the icons contained in this catalogue.

Machine swage

- for optimal break load Blue Wave recommends pressing or swaging/rolling the terminals onto the wire ropes.

PRESS

SWAGE

Recommended machines for this purpose are e.g. presses from TALURIT®, roller swaging machines from WIRETEKNIK or combined press and roller swage machines from TOPREFF 2000. For further information see next page.

Hand crimp fittings

- a range of fittings with outside diameter Ø 13 mm. Can be crimped onto the wires using a hand tool.

CRIMP

Recommended tools for this purpose is e.g. the Dubuis 18V Li-ion battery driven tool.

For further information see next page.

Swageless terminals

- If the exact length of the final wire is unknown or a machine not available, a swageless terminal enables attachment on site.

For further information see next page.

SCREW

On each page you find icons showing you the correct attachment to use.

Batch ID numbers and certificates

on request each product can be marked with serial number.

The product can then be traced back to the specific production batch and raw material.

Declaration of compliance with order, test reports and inspection certificates are made to order on request.

MACHINES AND TOOLS

MACHINES FOR MACHINE SWAGE FITTINGS

WIRETEKNIK ROLLER SWAGING MACHINE

Machine including 8 mm die

ART. NO.	DESCRIPTION
WTA200	With hand pump
WTA200PUH1	With PUH1 power unit, instead of hand pump
WTA200230V	Ready to use 230 V
WTA200400V	Ready to use 400 V
WTA20008	Extra roller die 8 mm

TOPREFF 2000, K50

Machine including 8 mm die

ART. NO.	DESCRIPTION
TRK50	Ready to use 230V, incl Ø 8 mm die
TRFOOT	Foot pedal
TRK008	Extra 8 mm die

TALURIT PRESS, 150T

Machine including 8 mm die

ART. NO.	DESCRIPTION
TAL150	150 ton swager body, needs hydraulic unit
TALHY3KW	Hydraulic unit 3,0 KW
TALHY4KW	Hydraulic unit 4,0 KW
TALHY55KW	Hydraulic unit 5,5 KW
TALHX08	Extra die 8 mm

HAND CRIMP TOOL

Tool including 8 mm die

DUBUIS, 18V

ART. NO.	DESCRIPTION
DUBACC	Complete tool, incl. battery and die
DUBBAT	Extra battery
DUB08D	Extra 8 mm die

SWAGELESS INSTRUCTION

Jaw housing

SS Jaws

Pressure ring (brass)

Head

- 1: First slide the jaw housing in place on the cable.
- 2: Then slide the jaws onto the cable, ensuring there is some space between the jaw section.
- 3: Place the brass pressure ring on the end of the cable. Make sure that the distance from the pressure ring to the end of the cable is 5 mm.
- 4: Slide the jaw housing over the jaws.
- 5: The terminal can now be assembled. Screw the head firmly on the jaw housing with a spanner. Then tighten the lock nut firmly with a spanner.
- 6: Do not reuse the jaws. Make sure that the dimensions of the terminal and cable match.

Note

After the first dynamic load the terminal MUST be tightened again. The terminal is developed for use with the following types of cable: 7x19 and 7x7. When assembling Swageless Terminals the breaking strength of the cable used will be reduced by 0-15%. Refer to the table for the breaking strength of the terminal.

Swageless Terminal Breaking strength:

Wire Dim 8,0 mm	5/16"	Breaking strength 54,5 KN	12,300 LBS
--------------------	-------	------------------------------	------------

Tightening torque for Swageless Terminals

Wire Dim: 8mm	5/16"	Nm 58	Lbf ft 43.0
------------------	-------	----------	----------------

On request also available with jaws for 1x19 wire construction.

Table for TCU ferrule after pressing

Ferrule No.	Wire Rope Capacity Diameter (mm)				Die Identification		
	Fill factor (f=0,40-0,50) Fibre Core		Fill factor (f=0,50-0,60) Steel Core		Dies marked	Diameter after pressing	Required pressure approx.
TAL0828	Min	Max	Min	Max	T	mm	kN
8	7,2	8,2	6,7	7,5	8	16	410

f = Fill factor, is the ratio between the sum of the nominal metallic cross-sectional areas of all the wires in the rope and the circumscribed area of the rope based on its nominal diameter.

C = Nominal metallic cross-sectional area factor of the rope.

$$C = \frac{f \cdot \Pi}{4}$$

WIRE CUTTER

Cuts up to ø12 mm cable, 2,8kg - 650 mm (x 180mm)

ART. NO.

ARCTOOL7

ANCHOR POINT STROPS W. QUICK LINK
